I assume that this tank was used for heating purpose?

For these tanks I recommend that you follow the state's requirements for removing USTs.

Here is a quick link to an MPCA document that might help ==>  
<https://www.pca.state.mn.us/sites/default/files/t-u2-20.pdf>

Hopefully this helps.

-Mark

We may have a building with possible underground fuel oil tank. The building will be demoed in the spring. How should this be handled?
